Commissioner Larkin made a motion to approve, seconded by Commissioner Farhy.

The proposal before the Commissioners is to provide the following:

- 1. Provide design, permitting, and construction drawings for the West Wayne Preserve Stormwater Management Project:** Use of the West Wayne Preserve, as was originally intended, for stormwater management (SWM). This portion of the proposal will be for Meliora to provide design, permitting, and bidding documents for converting the Preserve into a SWM facility. (please see attachments; note that the draft for the Preserve is not a final design). This task also includes meetings with the residents, Commissioners, and SWMAC. As noted above, Meliora will be refining the previous concept. Many of the trees in the Preserve are invasive species, declining, or near the end of their lifespan. I have required Meliora to include a tree survey of the Preserve; we can then determine if reforestation is the best move forward, working around existing trees, or a combination

of both. If authorized by the Commissioners, this phase of the proposal will go to bid in late March of 2019.

2. **Flood Reduction Options for the Darby Creek Watershed:** The intent of this portion of the proposal is to provide options, should it so please the Commissioners, to choose flood mitigation projects for this watershed, which includes South Devon Avenue, Arbordale, West Wayne, etc. Previous studies have suggested the use of Bo Connor Park and Warren Filipone Park for stormwater management. These will be revisited, as well as the area outlined in the attachment as Friends of the Radnor Trail Park. The possibility of public/private flood mitigation projects will also be evaluated. The deliverables for this task:
- I. Location of possible flood mitigation project
 - II. Quantification of flood reduction
 - III. Cost for design
 - IV. Budget cost for construction.
