Lieutenant

Joseph W. Pinto
Lieutenant

Fireworks Safety Tips

- If you decide to use fireworks, it is important to ALWAYS follow the instructions and safety tips to reduce your risk.
 - Never place any part of your body directly over a fireworks device when lighting the fuse. Back up to a safe distance immediately after lighting fireworks.
 - Never try to re-light or pick up fireworks that have not ignited fully.
 - Never point or throw fireworks at another person.
 - Keep a bucket of water or a garden hose handy in case of fire or other mishap.
 - Light fireworks one at a time, then move back quickly.
 - Never carry fireworks in a pocket or shoot them off in metal or glass containers.
 - After fireworks complete their burning, douse the spent device with plenty of water from a bucket or hose before discarding it to prevent a trash fire.
 - Make sure you know your local laws regarding fireworks.
 - Never allow young children to play with or ignite fireworks.
 - Avoid buying fireworks that are packaged in brown paper because this is often a sign that the fireworks were made for professional displays and that they could pose a danger to consumers.
 - Always have an adult supervise fireworks activities. Parents don't realize that young children suffer injuries from sparklers. Sparklers burn at temperatures of about 1200 degrees.
 - Make sure fireworks are legal in your area before buying or using them.

If you should have any questions or in case of an emergency, please call 911.
